

The slides and recording will be posted after the presentation at: <a href="https://www.hospitalsafetygrade.org/for-hospitals/key-dates-and-information">https://www.hospitalsafetygrade.org/for-hospitals/key-dates-and-information</a>

March 2025

## What is the Leapfrog Hospital Safety Grade?

The Leapfrog Hospital Safety Grade is an A, B, C, D, or F letter grade reflecting how safe hospitals are for patients.

The Leapfrog Hospital Safety Grade launched in June 2012.

The Grade is issued two times per year: Spring and Fall. This spring will be the 27th release.

More information is available at <a href="https://www.HospitalSafetyGrade.org">www.HospitalSafetyGrade.org</a>

## Who is eligible for a Leapfrog Hospital Safety Grade?

General acute care hospitals with enough publicly reported data

• Hospitals missing measure scores for more than 6 process/structural measures OR more than 5 outcome measures or PSI 90 do not receive a grade. A measure score for PSI 90 is required.

The Leapfrog Group is not able to calculate a Hospital Safety Grade for certain types of hospitals due to missing data:

- Critical Access Hospitals (CAH)
- Rural Emergency Hospitals (REH)
- PPS-exempt hospitals (i.e., cancer)
- VA Hospitals
- Indian Health Services
- Specialty hospitals

# Measures used in the Leapfrog Hospital Safety Grade

## **Measure Selection Criteria**

Measures are publicly-reported from national data sources, which reflect individual hospital performance, including:

- Leapfrog Hospital Survey
- Centers for Medicare and Medicaid Services data sets

Measures are endorsed or in use by a national measurement entity

Measures are linked to patient safety ("freedom from harm")

- Directly quantifying patient safety events
- Assessing processes that lead to better outcomes
- Identified by experts as important to patient safety

## **Spring 2025 Process and Structural Measures**

Measure Name	Primary Data Source	Reporting Period	Secondary Data Source	Reporting Period
Computerized Physician Order Entry (CPOE)	2024 Leapfrog Hospital Survey	2024	Imputation Model Applied	N/A
Bar Code Medication Administration (BCMA)	2024 Leapfrog Hospital Survey	2024	Imputation Model Applied	N/A
ICU Physician Staffing (IPS)	2024 Leapfrog Hospital Survey	2024	Imputation Model Applied	N/A
Safe Practice 1: Culture of Leadership Structures and Systems	2024 Leapfrog Hospital Survey	2024	N/A	N/A

## **Spring 2025 Outcome Measures**

Measure Name	Primary Data Source	Reporting Period	Secondary Data Source	Reporting Period
Foreign Object Retained	CMS	07/01/2021 - 06/30/2023	N/A	N/A
Air Embolism	CMS	07/01/2021 - 06/30/2023	N/A	N/A
Falls and Trauma	CMS	07/01/2021 - 06/30/2023	N/A	N/A
CLABSI	2024 Leapfrog Hospital Survey	07/01/2023 - 06/30/2024	CMS	01/01/2023 - 12/31/2023
CAUTI	2024 Leapfrog Hospital Survey	07/01/2023 - 06/30/2024	CMS	01/01/2023 - 12/31/2023
SSI: Colon	2024 Leapfrog Hospital Survey	07/01/2023 - 06/30/2024	CMS	01/01/2023 - 12/31/2023
MRSA	2024 Leapfrog Hospital Survey	07/01/2023 - 06/30/2024	CMS	01/01/2023 - 12/31/2023
C. Diff.	2024 Leapfrog Hospital Survey	07/01/2023 - 06/30/2024	CMS	01/01/2023 - 12/31/2023
PSI 4: Death rate among surgical inpatients with serious treatable conditions	CMS	07/01/2021 - 06/30/2023	N/A	N/A
CMS Medicare PSI 90: Patient safety and adverse events composite*	CMS	07/01/2021 - 06/30/2023	N/A	N/A

\*Note: CMS calculates PSI 90 using the ten (10) component PSIs listed above. While scores for each of the 10 component PSIs are NOT used to calculate Hospital Safety Grades, they will be publicly reported on the Hospital Safety Grade website.

## **Spring 2025 Reporting Periods**

#### 2024 Leapfrog Hospital Results

- CPOE, BCMA, IPS, the 2 NQF Safe Practices, and Hand Hygiene will be displayed as "2024." If you did not submit updates after August 31, 2024, these measures will not change from fall 2024.
- Total Nursing Care Hours per Patient Day has two reporting periods depending on when your Survey was submitted (01/01/2023 12/31/2023 prior to September 1 or 07/01/2023 06/30/2024 on or after September 1)
- CLABSI, CAUTI, MRSA, C. Diff, and SSI Colon will be displayed as 07/01/2023 06/30/2024, which has been updated from fall 2024 (CY2023).

#### **CMS Data**

- The CMS Care Compare data was not refreshed in January 2025 (it was refreshed on February 19, 2025).
- As a result, the CMS HAI and HCAHPS data used in the spring 2025 Safety Grade have the reporting period of 01/01/2023-12/31/2023. This data, downloaded on January 31, 2025, was released by CMS in the last quarterly update in October 2024.
- 3 HAC measures: 07/01/2021 06/30/2023 (same data used in fall 2024 Safety Grade)
- PSI measures: 07/01/2021 06/30/2023 (released by CMS in October 2024)

# **Imputation Model**

Updated in Fall 2024

# Overview of Imputation Model used for CPOE, BCMA, Hand Hygiene, and IPS

#### **STEP 1:** Use A Hospital's Most Recent Score on the Measure

- From past two rounds of Safety Grade (i.e., fall 2024 or spring 2024)
- Due to changes on the measure, Step 1 imputation will be paused until fall 2025 for BCMA

#### **STEP 2:** Use Imputation Point Assignment

- Point value is equivalent to receiving "Limited Achievement" on the Leapfrog Hospital Survey
- Note about IPS: Only hospitals that operate an adult or pediatric medical and/or surgical ICU or neuro ICU are eligible for Step 2 Imputation of the IPS measure.

# Step 1: Impute the hospital's most recent score on the measure Applies to CPOE, HH and IPS (not BCMA)

If the hospital had a score assigned by Leapfrog in the previous two rounds of grades, the hospital is assigned the most recent score on that measure in the current Hospital Safety Grade.

#### Example of Step 1 (from spring 2025):

A hospital did not submit a 2024 Leapfrog Hospital Survey by the Data Snapshot Date. The hospital's most recent measure scores for the three measures come from the spring 2024 Hospital Safety Grade, where the hospital's scores for CPOE, HH, and IPS were assigned by Leapfrog based on their 2023 Leapfrog Survey. In fall 2023, they were not scored due to missing too much data. In fall 2024, the hospital's CPOE score was 70, Hand Hygiene was 40, and IPS score was 100. For the spring 2025 Hospital Safety Grade, the score of 70 is used for CPOE, 40 is used for Hand Hygiene and 100 is used for IPS.

# Step 2: Use Imputation Point Assignment Applies to CPOE, BCMA, HH, and IPS

If the hospital does not have historical data from the last two rounds (i.e., fall 2024, spring 2024) of the Safety Grade, the hospital is assigned a point value that is equivalent to receiving "Limited Achievement" for this measure on the Leapfrog Hospital Survey.

Measure	Leapfrog Hospital Survey	Corresponding Safety
	Performance Category	<b>Grade Measure Score</b>
СРОЕ	Limited Achievement	15
ВСМА	Limited Achievement	25
IPS	Limited Achievement	5
Hand Hygiene	Limited Achievement	15

#### Example of Step 2 (from spring 2025):

The hospital is missing scores for CPOE, BCMA, HH, and IPS because they have never submitted a Leapfrog Hospital Survey. In fact, due to missing HCAHPS measures in past rounds, they have never been eligible for a Hospital Safety Grade until this year. In spring 2025, the hospital will be assigned the scores above for the CPOE, BCMA, IPS and HH measures and will receive a Hospital Safety Grade for the first time.

## **Step 2: Note about IPS**

Only hospitals that operate an adult or pediatric medical and/or surgical ICU or neuro ICU are eligible for Step 2 Imputation of the IPS measure.

- A hospital's ICU designation (i.e., operating a medical ICU, surgical ICU, or pediatric ICU) is determined from the number of medical, surgical and/or pediatric ICU beds reported in Worksheet S-3 Part 1 of the hospital's most recent <u>CMS Cost Report.</u>
- If your hospital does not operate an ICU but shares a CMS Certification Number with a hospital that does, please contact the Help Desk immediately if an IPS score was imputed.

# **Scoring Overview**

## **Z-Score Methodology**

- Standardizes data from individual measures with different scales to allow for comparisons (e.g., a linear mean score of 90 on H-COMP-1: Nurse Communication and a CLABSI SIR of 0.870).
- Counts how many standard deviations a hospital's score on the measure is away from the mean
- Mean is set to 0
  - Negative z-score: worse than the mean
  - Zero z-score: performance is at the mean
  - Positive z-score: better than the mean

## **Calculating Z-Scores**

Z-Scores can indicate to a hospital whether their measure score is above, below, or equal to the average hospital.

To calculate each measure's Z-Score:

- Process/structural measures:
  - (Hospital's Measure Score Mean)/Standard Deviation
- Outcome Measures:
  - (Mean Hospital Measure Score)/Standard Deviation

## **Calculating Standard Measure Weights**

Each measure included in the Safety Grade is assigned a standard measure weight using four criteria:

- Strength of evidence (rating of 1 or 2)
- Opportunity (rating of 1-3), based on coefficient of variation
- Impact (rating of 1, 2, 3) based on:
  - number of patients possibly affected by the event (0, 1, 2, 3)
  - severity of harm to individual patients (1, 2, 3)
- Number of measures (number of measures equals 1 for all measures except for PSI 90 where the number of measures equals 10)

Measure Weight Score = [Evidence + (Opportunity x Impact x Number of Measures)]

## **Dealing with Missing Data**

If a hospital is missing a measure score for any measure, the standard weight of that measure is redistributed to the other measures in the same measure domain. The new weight for each measure within the domain is calculated by re-apportioning the standard weight assigned to the measure with the missing score to other measures within the same domain.

For example, if a hospital is missing a measure score for ICU Physician Staffing because the hospital does not operate an adult or pediatric medical and/or surgical ICU, the standard weight will be re-apportioned to the remaining 11 measures within the process/structural measure domain.

To calculate the new weight of each of the remaining 11 measures in the process/structural measure domain, hospitals can use the formula below or use the Leapfrog Hospital Safety Grade Calculator ©, which can be found on the Safety Grade Review Website. Note that each domain contributes to 50% of the overall letter grade.

[Standard measure weight / (sum of standard weights for the remaining 11 measures in the process/structural measure domain)]\*50% = updated measure weight

## **Calculating the Overall Numerical Score**

- 1. Multiply the z-score for each measure by the measure weight
- 2. Sum the weighted z-scores from step 1
- 3. If a measure score is missing, the weight for that measure is re-apportioned to other measures within the same domain
- 4. Add 3.0 to the final numerical (this step helps to avoid possible confusion with interpreting negative scores)

3.0 + CPOE z-score X CPOE weight + IPS z-score X IPS weight + CLABSI z-score X CLABSI weight . . . etc.

# Important Dates and Reviewing Data

## **Data Snapshot Dates**

The data snapshot date is the date that Leapfrog will download the data published by CMS or submitted to Leapfrog via the Hospital Survey to calculate Leapfrog Hospital Safety Grades. All data, including Leapfrog Hospital Survey Results, must be finalized by these dates:

- Spring Data Snapshot Date: January 31
- Fall Data Snapshot Date: August 31

Updates to any of the data published after these dates are not used to calculate the Safety Grade.

The Leapfrog Hospital Safety Grade relies on publicly available data that hospitals have had the opportunity to review for accuracy. Therefore, Leapfrog does not allow hospitals to make updates to their data following the Data Snapshot Date.

## **Safety Grade Timeline**

#### Following each Data Snapshot Date:

Giant Leaps for Patient Safety

- <u>Courtesy Review Period</u>: As a courtesy to hospitals, Leapfrog will hold a Courtesy Safety Grade Review Period before the public release of each Leapfrog Hospital Safety Grade update. The Review Period is an opportunity for hospitals to review the data for accuracy (i.e., identify recording errors, hospital name and address changes, etc.) on a secure website and review changes to the scoring algorithm.
- <u>Free Town Hall Call</u>: Hospitals and other stakeholders are invited to a free Town Hall Call to hear about changes to the measures and scoring methodology, as well as details of the Courtesy Safety Grade Review Period and important deadlines.
- <u>Letter Grade Embargo Period</u>: Following the close of the Courtesy Safety Grade Review Period, Leapfrog finalizes the data and establishes letter grade cut-points. The Safety Grade Review <u>website</u> is refreshed, and hospitals can participate in a Letter Grade Embargo Period in which they can preview their letter grade prior to the public announcement.
- <u>Public Announcement</u>: Following the Embargo Period, Safety Grades are published on Leapfrog's public website.

## **Reviewing Leapfrog Hospital Survey Results**

- The Leapfrog Hospital Survey is open from April 1 to November 30 of each year.
- Following the Submission Deadline on June 30, Survey Results are published monthly on a secure
   'Hospital Details' <u>page</u> (starting July 12) and a public <u>website</u> (starting July 25). Hospitals are urged
   to review their Survey Results immediately.
- Hospitals that identify any data entry or reporting errors are instructed to log back into the Survey to submit a correction. Corrections must be submitted prior to the Data Snapshot Date of January 31.

## **NHSN Data Downloads**

- Leapfrog has four NHSN data download dates per Survey Cycle. We do not download NHSN data outside of these dates.
- 2024 Leapfrog Hospital Survey NHSN Data Download Dates:
  - June 26
  - August 23
  - October 24
  - December 19 (this data was used in the spring 2025 Safety Grade)
- Hospitals are required to complete the following to ensure Leapfrog obtains the appropriate SIRs:
  - Review and accept the Data Rights Template annually and ensure that any locations that were active during the reporting period, even if they are currently inactive, are included
  - Regenerate NHSN data and download copies of your CMS IQR reports and NHSN Annual Hospital Survey on the
     same dates as Leapfrog to save to your own records and to compare to the NHSN data Leapfrog uses for scoring.
  - Instructions for generating datasets and downloading these reports from NHSN are available here: https://www.leapfroggroup.org/survey-materials/join-nhsn

## **Reviewing CMS Data**

CMS administers several hospital-based reporting and payment programs including the Inpatient Quality Reporting Program, HAC Reduction Program, the DRA HAC Program, and Value-based Purchasing Program. Several measures collected and calculated by CMS via its various hospital-based programs are used in the Leapfrog Hospital Safety Grade (HAIs, HCAHPS, HAC, and PSI measures).

CMS provides hospitals with a 30-day confidential preview period <u>before</u> publishing performance data at <a href="https://data.cms.gov/provider-data">https://data.cms.gov/provider-data</a>.

More information is available at <a href="https://qualitynet.org">https://qualitynet.org</a>.

Courtesy Review and Letter Grade Embargo Period

## Secure Website for Hospitals to Review their Safety Grade Data

http://www.HospitalSafetyGrade.org/data-review

Usernames and passwords are emailed to Leapfrog Hospital Survey participants and mailed to hospital CEO's. You can also retrieve your username and password via the Help Desk.

Spring 2025 Review Period: Monday, February 24, 2025, to Friday, March 14, 2025

#### **Safety Grade Review Website for Hospitals**

The spring 2025 Leapfrog Hospital Safety Grade Review Period will be open from February 24 – March 14. By accessing the Review Website, you will be able to:

- Provide contact information for your hospital so we can send you important announcements about the Leapfrog Hospital Safety Grade.
- 2. Update your hospital's name, address, and CMS Certification Number.
- Review the source data used to calculate your hospital's preliminary numerical score and validate that we have recorded the correct information using the Review Instructions and Scoring Methodology.
- Download a copy of the Leapfrog Hospital Safety Grade Calculator<sup>©</sup>.
- 5. Preview your hospital's preliminary numerical score.

The Letter Grade Embargo Period will take place in April. During the Letter Grade Embargo Period, we will refresh this website to reflect any changes that occurred during the Review Period, finalized numerical scores, and hospital letter grades.

## **Source Data**

## **Safety Grade Review Website for Hospitals**

## **Hospital Source Data**

#### Information About Source Data

The information in the table below represents your hospital's performance on each of the 22 measures used in the Hospital Safety Grade as of January 31, 2025 (the <u>Data Snapshot Date</u>). Please review this information to ensure that Leapfrog recorded the correct measure score from each publicly available data source.

Information that you will need to complete the review process is available in the following documents:

- Review Instructions and Scoring Methodology
- Spring 2025 Hospital Safety Grade Calculator

Hospitals and other stakeholders are invited to a free Town Hall Call on March 5 at 2 PM ET to review the measures and scoring methodology, as well as details of the Courtesy Safety Grade Review Period and important deadlines. The Town Hall Call includes a 40-minute presentation and a 20-minute Q&A session. Register here.

## **Source Data**

\*Trim value: The measure score has been trimmed to the 99th percentile. Refer to A Note About Extreme Values in the Review Instructions and Scoring Methodology.

\*\*Imputed score: The measure score has been imputed using historical data or by assigning a score to reflect the lack of information available. Refer to Using Secondary Data Sources in the Review Instructions and Scoring Methodology.

Name of the Measure	Type of Measure	Data Source/Links	Reporting Period	Measure Score
Computerized Physician Order Entry (CPOE)	Structure/ Process	Assigned Score Due to Missing	Not Applicable	15**
Bar Code Medication Administration (BCMA)	Structure/ Process	Assigned Score Due to Missing	Not Applicable	25**
ICU Physician Staffing (IPS)	Structure/ Process	CMS Cost Report	Not Applicable	5**

## **PSI 90 Components – NOT used in scoring**

#### **PSI 90 Components**

CMS calculates PSI 90 using the ten (10) component PSIs that are listed in the table below. While the scores for each of the component PSIs will NOT be used to calculate the Hospital Safety Grades, they will be publicly reported on the Hospital Safety Grade website. To verify your hospital's PSI 90 Component scores, use the text links in the Data Source/Links column.

Component PSI	Data Source/Links	Reporting Period	Component Score (not used in numerical score)
PSI 3: Pressure ulcer rate	CMS	07/01/2021 - 06/30/2023	0.73
PSI 6: latrogenic pneumothorax rate	CMS	07/01/2021 - 06/30/2023	0.22
PSI 8: In-hospital fall with hip fracture rate	CMS	07/01/2021 - 06/30/2023	0.37
PSI 9: Postoperative hemorrhage or hematoma rate	CMS	07/01/2021 - 06/30/2023	2.66
DCL 10: Destanarative souts kidney	CMC	07/01/2021	1.60

## What if the Measure Score Doesn't Match the Public Report?

Hospitals must **contact the Help Desk immediately** if they suspect a measure score is incorrect.

However, they should double check the following information before contacting the Help Desk:

- **Data source** the data source listed on the Safety Grade Review Website is what you are referring to when verifying your measure score. You should be using the direct links provided in your Source Data table. For example, if Leapfrog Hospital Survey is listed as the data source for the HAI measures, and you are referring to the CMS HAI data when verifying your measure score, it will not match because that data was not used.
- **Measure** the measure listed on the Safety Grade Review Website is what you are referring to when verifying your measure score.
- **Reporting period** the reporting period listed on the Safety Grade Review Website is what you are referring to when verifying your measure score.

When you contact the Help Desk about a potential discrepancy, you must include a copy of the public report or a screenshot that shows a different score for the measure. Please be sure the data source, measure name, and reporting period are visible in the screen shot. If we find a recording error, we will update the measure score and numerical score before assigning a Letter Grade. You will see an updated numerical score during the Letter Grade Embargo Period.

## **Preview Preliminary Numerical Score**

Remember that the numerical scores posted during the Safety Grade Review Period are **preliminary** as changes do occur during the Safety Grade Review Period.

Final numerical scores will be posted, along with the letter grade, at least two weeks prior to the public announcement.

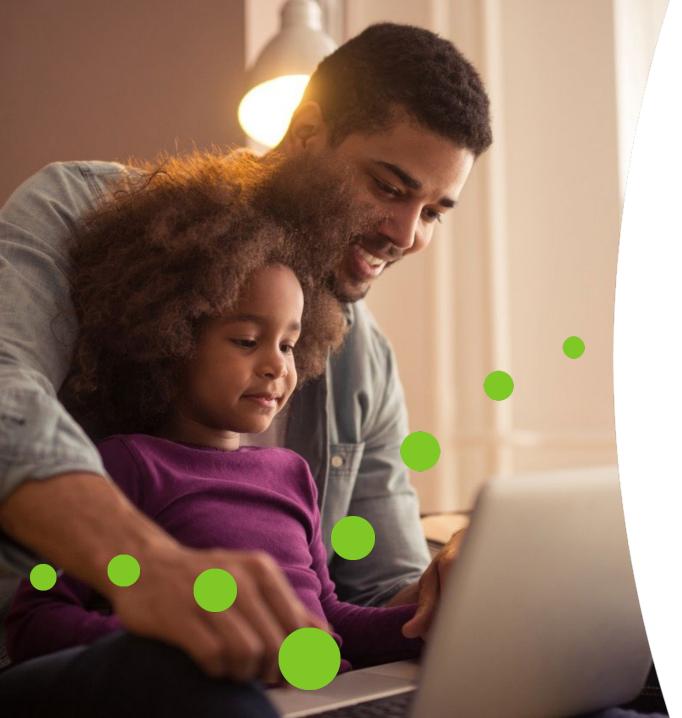

Hospitals will be alerted via an email sent to the addresses provided in the Contact and Reviewer Information fields. And the second s

## **New Deep Dive Session Announced**

#### **Deep Dive into the Leapfrog Hospital Safety Grade**

April 23 from 1:00 – 4:00 PM EST

Have questions about the differences between the Leapfrog Hospital Survey and Hospital Safety Grade? Need help figuring out how Safety Grade scores are assigned to Leapfrog Hospital Survey Results?

This session will provide an in-depth review of the differences between the Survey and Safety Grades and the measures from the Survey that are used to calculate the Safety Grade, including CPOE, BCMA, ICU Physician Staffing, Nursing Workforce, the NQF Safe Practices, and NHSN infection data.

This session will also include a review of the Safety Grade methodology and key dates, and overview of the Hospital Safety Grade calculator.
